

Credit Name: Chapter 3

Assignment Name: mastery DivAndMod

The following questions can help you in thinking critically about your problem-solving processes:

Understanding the Problem

How did you approach understanding the challenge?

i saw it was a more simple code and it seemed fun to make.

Were there any parts of the problem you found confusing at first? If so, how did you resolve that confusion?

no problems for this one

Planning the Solution

Did you create a plan or break the problem into smaller steps before coding?

I don't think I broke it into smaller steps

How did you decide on the tools, data structures, or algorithms to use?

you can say I threw it into a blender. no real algorithm just some simple code

Implementation

Did you write the code in small pieces or attempt the entire solution at once?

I would say I did it all at once

How did you test your solution along the way to make sure it was working?

I tested it at the very end and fixed anything that went bad

Overcoming Challenges

What part of the problem was the most difficult for you?

I don't think it was difficult

How did you handle moments when you felt stuck or unsure of what to do next?

I did not feel stuck or unsure on what to do next

Learning

Was there anything you learned that you think will help you with future challenges?

if it works. it works
